DESCRIPTION

The new glasses by MuranoVitrum are inspired by the typical Muranese "Goti de Fornasa" (Furnace glasses).

The Goti de fornasa were created at each glass factory for the workers of the piazza, without particular care in giving them an even shape. The glasses were very different in shape and color so each one could identify its own glass.

Nowadays they've become an exquisite example of Murano glass art and are a great treat for each table.

Colors may vary depending on the maestro's creativity. Colors will be randomly chosen. For checking available colors or for any preference, contact our customer care.

Enriched with the [avventurina](#) technique that gives each glass a sparkling surface.

Handmade in Venice using the ancient Murano glass knowledge. Each glass is different from the others, hence unique. Size and color could slightly differ from what indicated in this page: it's to be considered as a proof of craftsmanship.
