This cube is a unique piece and its timeless luxury makes it perfect for enriching any ambiance.

DESCRIPTION

From Romano Donà an astonishing composition of two different sculptures: the base has been created with the same techniques of the overlying cube. The straight square lines, the incredible little galaxy of shapes trapped inside the crystal glass, the choice of elegant colors, the different shapes it has from different angles, everything suggests that the Cube is unlike anything else. It is - in fact - a unique piece and its timeless luxury makes it perfect for enriching any ambiance.
