

SFUMATI VASE - 25413

\$679.16

Sfumati Vase Diameter 10,5

DESCRIPTION

The gradient collection is composed of three very elegant shapes, which can be executed in three different colors. They are made by our masters with [blown](#) glass, subsequently satin-finished and [engraved with a grinding wheel](#). The wavy lines along the body enhance the shades of the colors submerged in the crystal. The effect is very suggestive and elegant.

We recommend these vases to collectors and for gifts of a certain importance.
