

TIGER - MURANO GLASS

\$4,116.35

Multicolored tiger, homage to Ercole Barovier

DESCRIPTION

Luigi Moro designed this tiger inspired to the Ercole Barovier production, made by Alessandro Barbaro which is one of the most skilful and important artists we had in Murano. His peculiarity was the high sensibility in making animals. We are very pleased to propose some of his works in our website, considering that his artpieces are usually displayed in the most important Murano show-rooms and in exclusive glass galleries. This tiger is one of a kind and was realized by him and his team of 4 handcrafts, while he personally signs the piece. The pure gold leaf is applied underheat. We hope these pictures can express the feeling of the movement and the powerful proportions of the animal. We only have a one of these works available so please, don't loose time and the possibility to receive this at home in a few days.
