Traveller Clown - large

### DESCRIPTION

---

Here you are an original and funny multicoloured glass clown! It reproduces a happy clown, who is holding an umbrella in the right hand and a luggage in the left hand. It is very colourful dressed and it is completely made of Murano glass. It is very nice, because it is not only smiling, but it is laughing, and it will convey happiness when you will look at it! Dario Frare is the only artist in Murano able to realize this kind of glassworks in these dimensions with the "lume" technique. This piece is realized "a lume" with the "incamiciato" technique, that consist on many tight, superimposed glass layers, to obtain original and colourful decorative effects!
