### DESCRIPTION

The necklace is made up of two large violet Murano glass beads, with coloured veins. The beads are supported by a steel wire from which hang a multitude of small beads. The Sandra necklace is also decorated with other shiny faceted elements. You can choose among three different colour schemes: violet, with lilac black and white beads, red, with amber red and black beads, black&white, with anthracite gray crystal and black beads. The glass beads are made in Venice by Muranese glassmasters for MuranoVitrums, using the ancient Murano glass techniques.
