DESCRIPTION

This is not a usual ashtray but a refined object of contemporary design, handmade with the sbruffo technique and grinding glass, which is Alessandro Mandruzzato's speciality. With its clear and original shapes - that underline its robustness and, at the same time, its sophistication - this red and amber ashtray belongs to the Sunset collection; a collection that revives, enclosed in sculptural shapes that create a special light play, the warm and vibrant colours of the setting sun. The Sunset ashtray can be coupled with the colorful pieces of the same collection.
