

## 3 SUPI VASE

\$4,762.15

Murano glass crystal vase, made up by three elements.

---

### DESCRIPTION

This peculiar vase is made by maestro **Romano Donà**, who entered the kiln business at an early age. From 2003 Romano began experimenting with the traditional Muranese techniques of filigrana and incalmo making the use of these centuries-old processes look entirely new. **The 3 Supi Vase is an expression of his creativity and innovation.**

To create this three vases created he uses a **mix of technique as ambar sbruffi and a blue canna technique.** Then united together in a unique crystal element with the **sommerso technique, including air bubbles.** The procedure is similar to the one used for Murano glass aquariums.

The colors yellow and blue and it's modern shape is definitely a art work to show-off in any space.
