Vase in blown Murano glass, made of different layers

[Click here to see the whole Indiscreto collection](#)

DESCRIPTION

Vase in Murano blown glass, made of different glass layers: The first layer includes *submerged cannas*; the second one consists in an opaque *incamiciato* glass. The whole is then worked with a grinding stone to make portholes through which the *cannas* are visibile. Designed by Stefano Toso and handmade by Romano Donà in Murano, following the ancient Muranese techniques.
