

TWIN VASES - SQUAT

\$2,846.16

Tall vase from the Twin Vases concept by Romano Donà.

DESCRIPTION

Decorate your home with modern and unique pieces made in Murano Glass.

This Vase is made in **Blown Murano** glass vases with green and orange sunk **canne**. The Twin Vases come from the same concept by **Romano Donà**; one is tall whereas the other one is squat. The two vases have a rare and original double opening on the top: this feature **requires a longer and more difficult processing than usual**. In fact the whole structure is more likely to break apart while it's manufactured. That's why this finish is a real virtuosity within the reach of few glass masters.

Designed by Stefano Toso and handmade by Romano Donà in his Muranese atelier. **The Twin Vases come from a private collection** - composed by particular pieces - of which MuranoNet is treating the sale.
